

Carmín

COMPOSITION

Each tablet contains:
Desogestrel 0.075 mg.

DRUG ACTION

Oral contraceptive for nursing mothers.

CARMIN does not compromise breast milk quality or quantity. Does not compromise the breastfed infant's growth.

Additionally, being a progestin-only contraceptive, CARMIN is one of the most reliable alternatives available for women wishing to use an estrogen-free oral contraceptive.

DOSAGE

Take one tablet on a daily basis, at the same time every day.

Start a new blister pack on the day after you finish the previous one without interruption.

PRESENTATION

Each package contains 28 tablets.
