

*Diva*

## COMPOSITION

Each tablet contains:  
Drospirenone 3.00 mg. + Ethinyl Estradiol 0.020 mg.

## DRUG ACTION

Oral contraceptive.

Regulates the menstrual cycles.

In addition to birth control DIVA provides the following benefits:

- Bodyweight remains stable or decreases slightly.
- Acts on the skin making it more beautiful and healthy.
- FDA-approved formula for the treatment of Premenstrual Dysphoric Disorder (signs and symptoms developed a few days before menstruation).

## DOSAGE

Start the treatment on the first day of the period with the first active tablet.

Take one tablet on a daily basis until you complete the package (24 active tablets first, then the 4 placebos). The next day take the first active tablet of a new package.

## PRESENTATION

Each package contains 28 tablets (24 active + 4 placebos).
